40	SUPPLIER SOCIOENVIRONMENTAL IMPACT MANAGEMENT	18	INVESTMENTS OUTSIDE OF BRAZIL
50	TRAINING & DEVELOPMENT	47	INTERNAL CLIMATE MANAGEMENT
65	FINES/NON-CONFORMITIES	11	RELATIONSHIP WITH THE COMPETITION

The commission in charge of preparing and assessing social and environmental responsibility reports is responsible for the drafting process of the Sustainability Report. It is composed of representatives from 24 areas and subsidiaries of the Petrobras System, which consolidate the information compiled by a network of collaborators, which, in 2009, totaled 290 people. The data are entered in a computerized system and are used as input to prepare the report's content, which is validated by the commission before being published.

In addition to the Materiality Test, we consulted 109 people in the same cities, plus 19 representatives of the committee in charge of preparing and assessing social and environmental responsibility reports, to assess the 2008 Social and Environmental Report and single-out improvements to be made in the current report.

Over and beyond to information regarding the GRI indicators, this report presents data that compose the Social Report - Ibase Model. The criteria required by the Brazilian Association of Publicly Traded Corporations (Abrasca) to grant the Abrasca Annual Report Awards also serve to guide the content of this report.

#### **WHO DID WE PREPARE THE SUSTAINABILITY REPORT FOR?**

Petrobras expects the report to allow all of its stakeholders to get to know and assess its performance in the economic, social, and environmental areas during the year. The groups that make up Petrobras' strategic stakeholders are featured in the Communication Channels chapter.

Questions, suggestions and criticisms of this report should be e-mailed to [rs2009@petrobras.com.br](mailto:rs2009@petrobras.com.br).
